(54) SHEET-SHAPED PACK MATERIAL

(57)Abstract:

PROBLEM TO BE SOLVED: To prepare a sheet-shaped pack material, capable of suppressing the suppuration of injuries which may occur after removal of sebum or aged keratin by compounding the obverse surface or the entire of a sheet-shaped pack material with a bactericidal agent and/or an antibacterial agent.

SOLUTION: This peel off-type sheet-shaped pack material is obtained by compounding preferably the sticky adhesive layer of the utmost surface with a bactericidal agent and/or an antibacterial agent. Further, the compounding amount of the bactericidal agent or an antibacterial agent is, e.g. 0.05wt.% in the case of chlorhexidine glucuronate based on the entire weight of the pack material. As an example of a method for compounding the pack material with the bactericidal agent or the antibacterial agent, it is cited that a stock solution of the pack material mainly composed of an aqueous or alcohol solution of an adhesive agent is compounded with the bactericidal agent or the antibacterial agent, and subsequently the resultant solution is processed to form a sheet shape by using a device such as a doctor blade followed by drying. Thus obtained pack material can prevent the suppuration of many injuries or hyperplasia which may occur after good removal of sebum.

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
JP 10001418	A	4	A61K-007/00	

Abstract (Basic): JP 10001418 A

The face pack contains a peel-off sheet. The surface of the sheet
has several pores. A disinfectant and/or an anti-microbial agent is
added to the pack.

ADVANTAGE - Enhances removal of aged keratin and hardened keratin
layer. Suppresses supuration of injury in skin.
